SUSTAINABILITY OF THE FOREST PRODUCTS INDUSTRY

Mr. KING. Mr. President, today I wish to recognize the paper and forest products industry to support their advancement of six sustainability goals.

There are about 18,000 hard-working men and women employed by the forest products industry in the State of Maine where we have about 40 wood products and paper manufacturing facilities contributing over \$900 million to the economy through jobs and wages and over \$4 billion in industry shipments of products, making the forest products industry one of the largest manufacturing sectors in our State.

Sustainability is inherent to the pulp, paper, packaging, tissue, and wood products manufacturing industry. These products are made from renewable and recyclable resources, and these companies have a good track record of managing natural resources in order to ensure they can continue making useful products in the future.

In 2011, the industry established the Better Practices, Better Planet 2020 initiative pursuing one of the most extensive sets of sustainability goals established for a U.S. manufacturing industry.

By 2020, the Better Practices, Better Planets goals aim to exceed 70 percent paper recovery for recycling, improve purchased energy efficiency by at least 10 percent, reduce greenhouse gas emissions from member facilities by at least 15 percent, increase the amount of fiber procured from certified forestlands or through certified fiber sourcing programs in the U.S. from 2005 to 2020 and work to decrease illegal logging, improve worker safety by 25 percent, with a broader vision of zero industry injuries, and reduce water use in member facilities by 12 percent

This week the American Forest & Paper Association released their 2016 report on the industry's performance. The industry works with government agencies, communities and other stakeholders to employ advanced sustainability practices benefitting the economy, environment and society and transparently reports on their performance. I am pleased to announce that the industry has met the greenhouse gas emissions and safety goals ahead of schedule.

These companies are committed to sustainability along the entire value chain, starting with the renewable resources they acquire to make their products. AF&PA members procured 98 percent of their fiber through certified fiber sourcing programs and have also increased the amount of fiber procured from certified forestlands to 29 percent.

Also, AF&PA companies are strong proponents of international efforts to suppress illegal logging and to reduce the demand for illegally harvested forest products.

AF&PA's mandatory Environment, Health & Safety Principles require that members have health and safety policies in place. Implementing worker training, increased automation, and a host of injury preventive measures and safeguards allowed AF&PA members to reduce their incidence rate by 40.8 percent between 2006 and 2014. These companies are committed to continue to look for new ways to reach their aspirational goal of zero workplace injuries

The industry's purchased energy efficiency improved by 8.1 percent due to investments in energy efficiency projects. Many pulp and paper mills are largely energy self-sufficient, 56 percent of electricity needed to power manufacturing processes was self-generated, and, in some cases, supplying energy to the electric utility grid.

Improved energy efficiency and the use of less carbon-intensive fuels and carbon-neutral biomass enabled the industry to significantly reduce its greenhouse gas emissions. These companies reduced their greenhouse gas emissions by 16 percent, surpassing the goal of 15-percent reduction.

Water is a valuable natural resource and a vital component of the paper-making process. The forest products industry directly returns about 88 percent of the water it withdraws and uses in its manufacturing processes. Ongoing technology and innovation enable water to be reused and recycled 10 times, on average, throughout the pulp and paper mill process before it is treated in a wastewater system and returned to the environment. So far, water use at these pulp and paper mills was reduced by 6.5 percent since 2005.

The industry's commitment to sustainability extends beyond the manufacturing process: More than 60 percent of paper consumed in the U.S. was recovered for recycling each year since 2009, reaching a record 66.8 percent in 2015.

Paper recovery success is possible thanks to the millions of Americans who continue to recycle at home, work, and school every day. In 2014, 96 percent of the U.S. population had access to community curbside and/or drop-off paper recycling services. AF&PA works to promote paper recovery by creating materials to educate consumers about best recycling practices.

I ask my colleagues to join us in congratulating this industry on taking steps to improve environmental performance, continue economic progress and support our communities. I am proud of this industry's progress and their continued commitment to advance sustainability performance.

THE IMPORTANCE OF SUMMER LEARNING

Mr. WYDEN. Mr. President, I want to take a moment today to stress the importance of providing young people with safe places to learn during the summer months. Summer is in full swing, and families are deciding how their children's time will be spent while school is out. Unfortunately, not all families in America can afford en-

riching experiences like summer camps and summer tutors.

That gap between families who have resources and those that do not is expressed clearly in their children. Evidence shows that students who lack access to summer learning, informal or structured, start the school year behind. When many kids are having to review last year's lessons, then all the kids have to spend that time reviewing last year's lessons. This puts all our kids behind.

Simply put, the long summer break should not be a long break from learning.

With Oregon's 4-year high school graduation rate at an alarmingly low 74 percent, it is long past time we shine a spotlight on summer learning loss and its impact on our students' path toward graduation. Summer learning loss has consequences that can damage a child's long-term academic and career success. That is especially important in my State where one in four teenagers doesn't make it to graduation on time.

Research by the National Summer Learning Association shows that most students lose math and reading skills during summer break. And unfortunately, students from low-income families fare even worse. The sad truth is that most students lose about 2 months of grade level equivalency in math computation skills over the summer months, and low-income students lose an additional 2 months in reading achievement.

As parents, community leaders, educators and policymakers, we must provide every resource possible to bridge that gap for disadvantaged and low income students. I have long fought to close the achievement gap and support all students on a path toward high school graduation and beyond.

I know so many great education advocates in Oregon who share these goals, and I want to commend Oregon's tremendous educators who work on this effort every single day. My good friends at Oregon Afterschool for Kids have made a strong commitment to keep kids learning all summer long. Their efforts to open up school libraries and school cafeterias in Woodburn, Salem, Eugene, and around the State have truly made a difference in children's lives by providing them with a safe and welcoming learning environment during the summer. I have often seen parents bring their children for a free lunch and stay for the free books.

This year, I hope to see even more communities come out and support our students by hosting summer learning activities. Even if you cannot attend events to serve lunch and read stories to classrooms full of children, remember that supporting summer learning is easy. Volunteering your time or donating books or crayons to neighbors is another way to support young learners. More ideas can be found in the "Summer Learning Tip Sheet for Parents" provided by the National Summer Learning Association.

As I have traveled around my State having conversations in high school auditoriums and school gyms, I have heard so many good ideas on how to help students succeed in school. Oregonians agree that we must support all aspects of a student's life to improve their outcomes, and I will add that this rings true all year long. I have seen firsthand that our communities are ready to come together and support students who need it. This is truly the Oregon way.

I am committed to helping more of our students get their high school diplomas and increase the rate at which our students are graduating from high school. Fighting summer learning loss is one way we can keep all students on a path toward a bright future.

90TH ANNIVERSARY OF THE HOLLYWOOD THEATRE

Mr. WYDEN. Mr. President, this year marks the 90th anniversary of the Hollywood Theatre in Portland, OR. Now a nonprofit organization, the Hollywood Theatre is an important Oregon landmark with a rich cultural history. Today I want to honor the Hollywood Theatre's 90 years of educating, entertaining, and bringing the community together through film.

The Hollywood Theatre was built in 1926, at the very end of the silent movie era. It was designed in an opulent Spanish Colonial Revival style, featuring extravagant interiors and a recognizable terra cotta exterior. Ninety years ago, it opened its doors to thousands of Oregonians who flocked to the luxurious theater to see its first show, "More Pay-Less Work," for a quarter. It thrived during cinema's transition to "talkies," hosting not only films but also community events such as bond drives during WWII and annual Rose Festival ceremonies. It was such a popular destination that the Northeast Portland neighborhood surrounding it became known as the Hollywood District.

In the 1960s, the popularity of television caused the Hollywood Theatre to fall on hard times. Although it was added to the National Register of Historic Places in 1983, it slipped into a period of disrepair and nearly burned down. Fortunately, it was purchased by Film Action Oregon, a local nonprofit, in 1997. Its new management returned the theatre to its historic appearance and renewed its status as a Portland jewel and community hub. The Hollywood Theatre now plays independent films and hosts film festivals, comedy shows, lectures, and continues the tradition of hosting community events. It is recognized by the national film community for its exceptional selection of films and support for local filmmakers through funding and consultation. Later this summer, travelers will be able to witness the theatre's newest project, a small theatre in the PDX airport, which will showcase short films by local artists. What better way to

wait for a flight than to grab a local microbrew and enjoy a local short film? No other airport in the Nation can boast such a treat.

The Hollywood Theatre is a testament to the Oregonian values: supporting small businesses, building and engaging local communities, making art accessible, and respecting and reviving historic landmarks. It exposes patrons to a wider variety of films than those offered by larger cinemas, often offering thought-provoking alternatives to blockbusters. In an age of multiplex theaters and in-home streaming services, it has taken a lot of passion for the Hollywood Theatre to pursue its mission and a lot of local support to keep it viable and flourishing. I would like to congratulate everyone who has been a part of its success. Hollywood Theatre. Thank you for inspiring countless people through film and community.

50TH ANNIVERSARY OF MAINE'S ALLAGASH WILDERNESS WATER-WAY

Ms. COLLINS. Mr. President, today I wish to commemorate the 50th anniversary of the Allagash Wilderness Waterway in northern Maine. This 92-mile stretch of lake, shore, and river is a shining example of the dedication of the people of Maine to protect and preserve the natural beauty and heritage that define our great State.

For thousands of years, the Allagash was the hunting and fishing grounds of the Wabanaki, and the river's northerly flow provided an important transportation link between the Maine coast and the Saint John River. The Waterway's Native American heritage is found in such appellations as Umsaskis Lake and Musquacook Stream. In 1857, Henry David Thoreau explored the upper reaches of the Allagash during his third trip to the Maine woods and learned from his Penobscot guide that the river's name referred to the useful bark that could be harvested from the vast forests along its banks.

In the years that followed, the Allagash became a vital part of Maine's timber industry. While hiking through the region's remote wilderness, it is possible to come upon abandoned steam locomotives deep among the trees, remnants of the vast lumbering operations of the early 20th century. As the Allagash, rich with fish and game, became a favorite destination of outdoor enthusiasts from around the world, the surrounding woodlands have remained very much a part of Maine's working forest economy.

In 1966, the people of Maine recognized the special qualities of the Allagash and voted to protect it by approving a \$1.5 million bond to "develop the maximum wilderness character" of the river, and the Maine Legislature established the Allagash Wilderness Waterway. Two years later, Maine Senator Edmund Muskie authored an amendment to the National Wild and

Scenic Rivers Act of 1968 that combined permanent Federal protection with permanent State administration. In 1970, the Allagash Wilderness Waterway was granted Federal designation as a wild river and became the first State-administered component of the National Wild and Scenic River System.

The Allagash Wilderness Waterway captures the essence of the great north woods. This 50th anniversary is the time to celebrate the commitment to safeguard for generations to come this special place that captures the essence of the people of Maine.

RECOGNIZING ATHLETIC TRAINERS

Mrs. ERNST. Mr. President, today I wish to call attention to a group of health care providers who play an important role in the patient care continuum—athletic trainers. These dedicated professionals who work in Iowa and across the United States provide valuable services to patients and make a real difference in the lives of those they treat.

Athletic trainers play a key role in their local communities. Many of them work in educational settings including colleges, universities, elementary schools, and secondary schools to keep student athletes safe. Others work in rehabilitation clinics, hospitals, fitness and community centers, or even for professional sports teams to prevent injury and help injured patients recover.

Because of the key preventative and rehabilitative services provided by athletic trainers, many patients are able avoid unnecessary disruption of normal daily life. This enables folks to stay mobile and to contribute to their communities.

I ask my colleagues to join me in recognizing athletic training as an important profession in our Nation's health care system and in expressing gratitude for the important impact these individuals have on promoting the overall health and well-being of the public.

TRIBUTE TO JAMES WALLNER

Mr. SESSIONS. Mr. President, I am pleased to compliment the extraordinary work of James Wallner for the U.S. Senate. James is one of the most intelligent, diligent, and principled Senate staffers I have ever known. He started in my office as a legislative assistant, then was promoted to be my legislative director. He impressed us all with his ability to master complex legislation, to get to the core of an issue, and to intelligently discuss it with regular Alabamians and national experts. He then became the staff director of the Steering Committee, where he also performed superbly. I was able to work closely with him during this time, also. In these roles, he has combined an acute intellectual interest in the Senate rules, along with a
